Assignment 4

High Fidelity Prototype

This is the interface where the user logs in by email, mobile number, and password, or by another login from Google, Facebook, or an Apple account. And there is a Sign in if it has not been registered before.

If the user didn't have an account, they will go to the sign-up page. In the sign-up page the user will enter their First and last name, their phone number and their email and password.

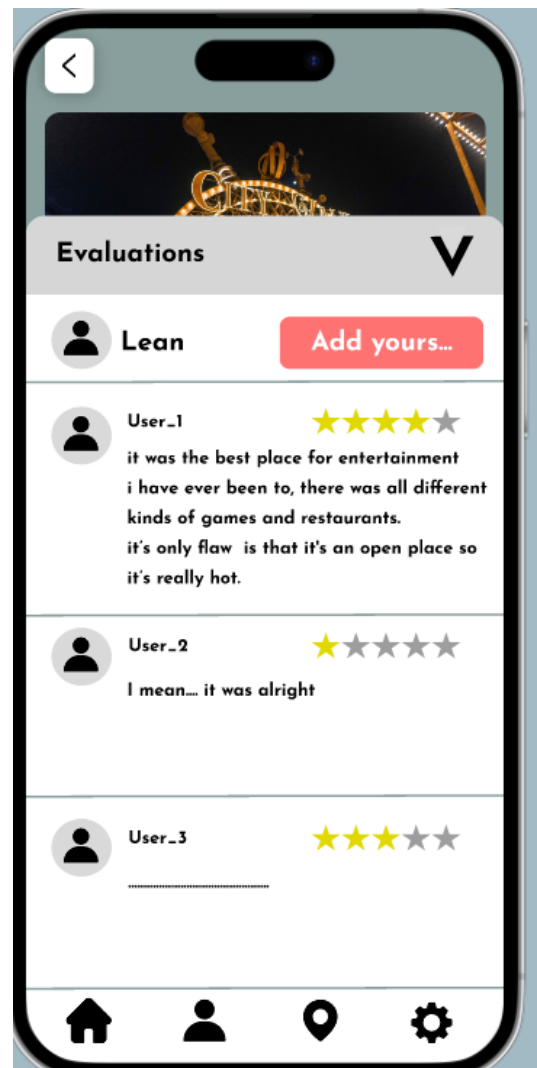

Here the user will press on the map to choose the region they want, and it will show up the events and activities could be done there with the time and the specific location. They can scroll down and see the other places.

If you swipe to left, you will be able to see more features. Booking is for the user reservations and Like for the tourist places they liked, and notification is for notify the user for any information they asked for.

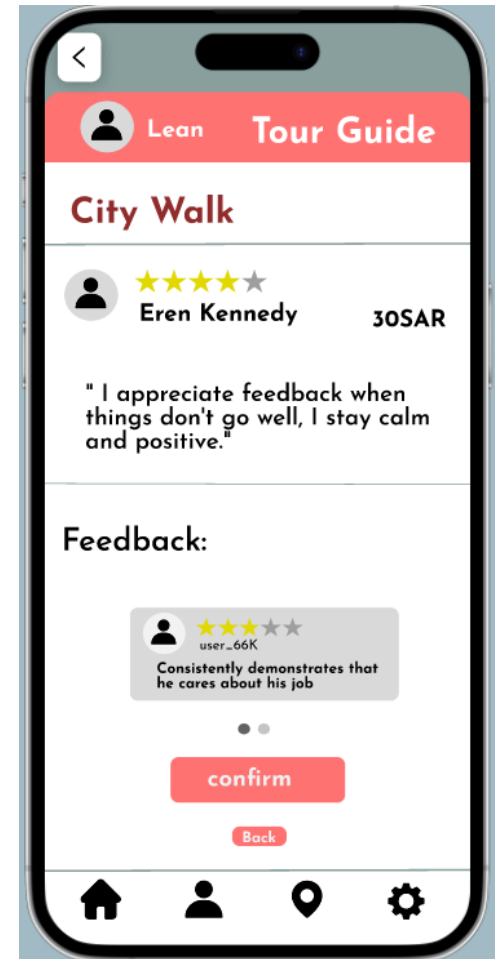

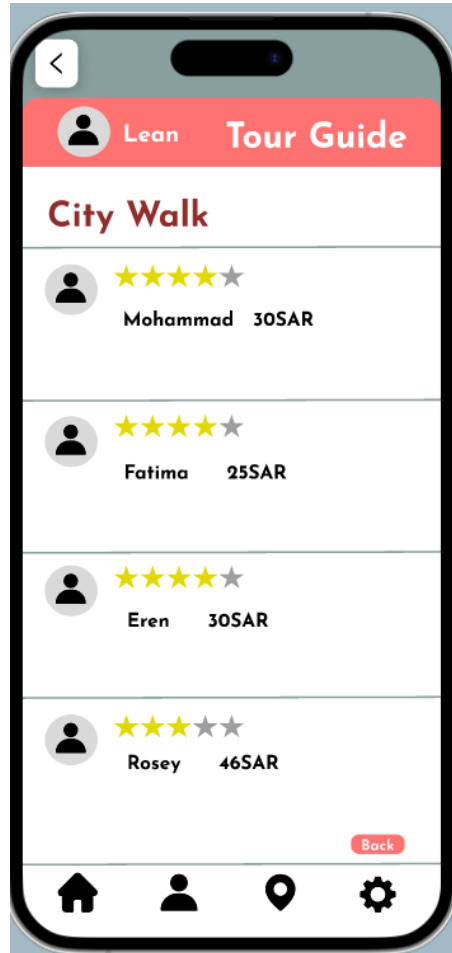

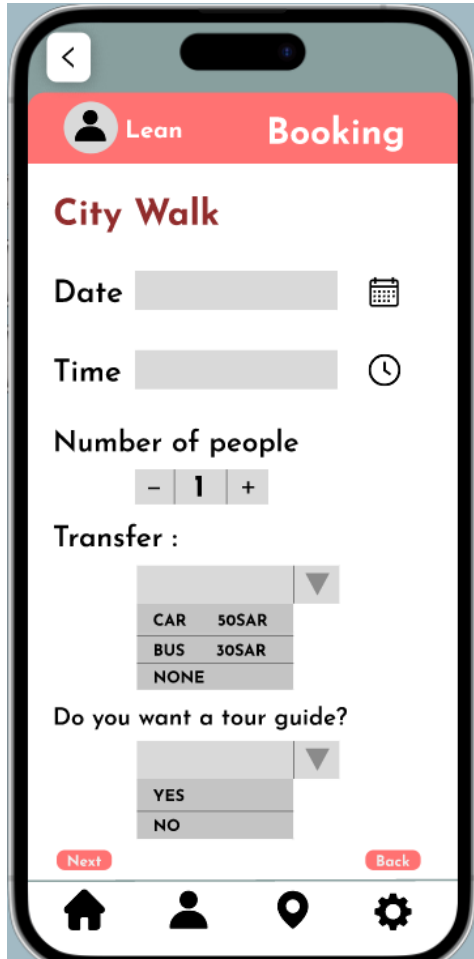

If the user clicked on the map it will appear the whole map so they would be able to see the places.

By choosing the place the user wants, they will get to read a brief description about the activity, also they can add it to favorites or share it with other.

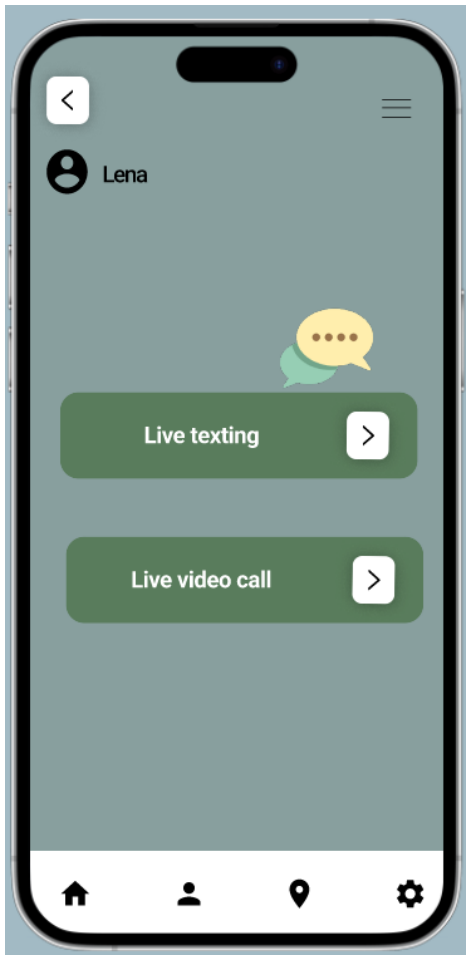

the user will be able to see other people's reviews about the place/activity, and they're able to share their own reviews too.

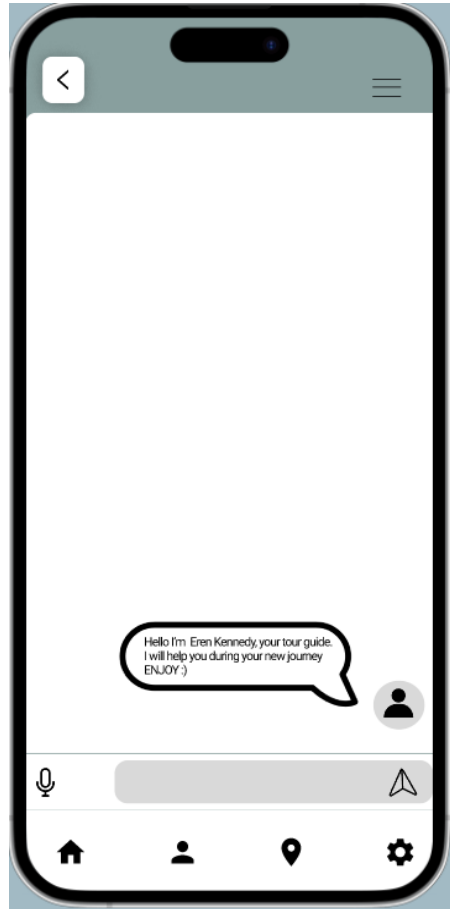

After choosing the event the booking page will appear to the user with the information about the reservation that's made and asking them if they want a tour guide or not. Also, they can choose a transfer method.

If the user wants a tour guide here will show them the available tour guides and the price for each one, the prices could be high and low according to their experts. If not, the page won't appear.

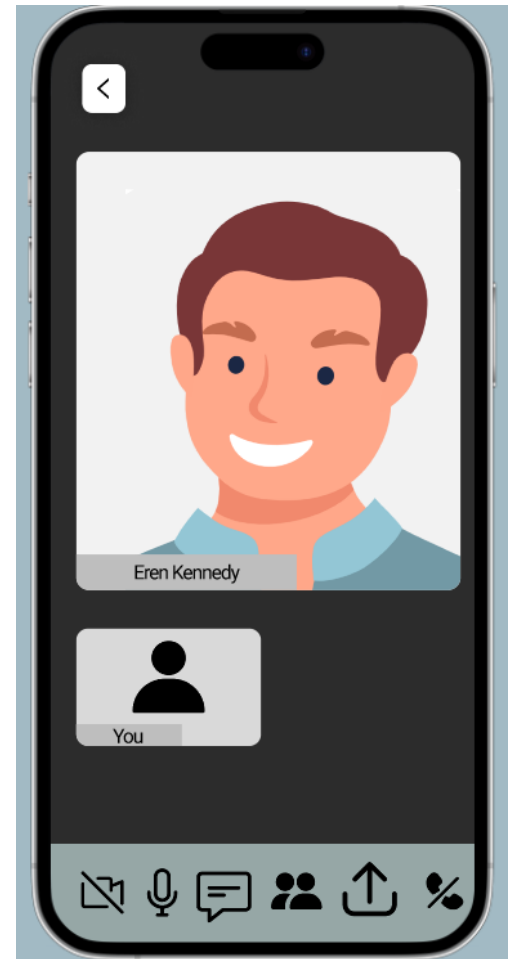

The user can see a little information about the tour guide. And a confirmation button if they want this tour guide.

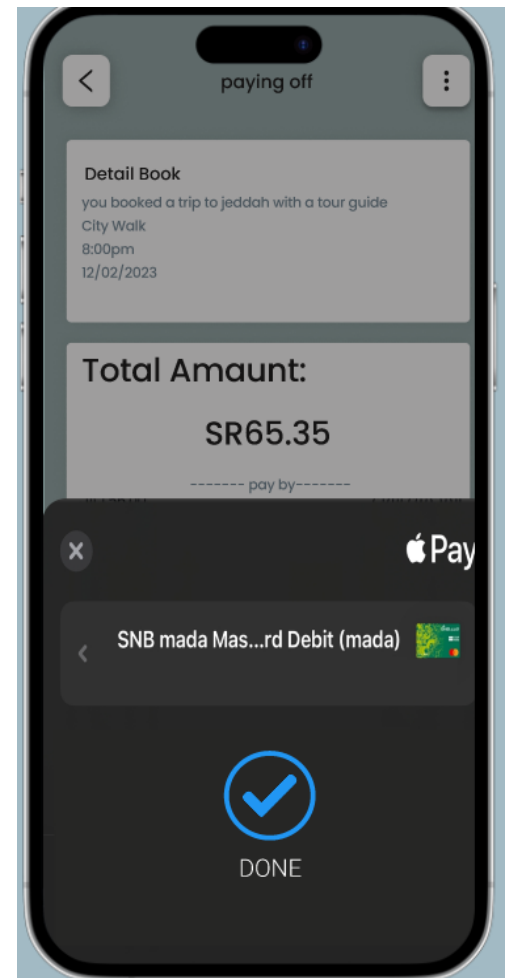

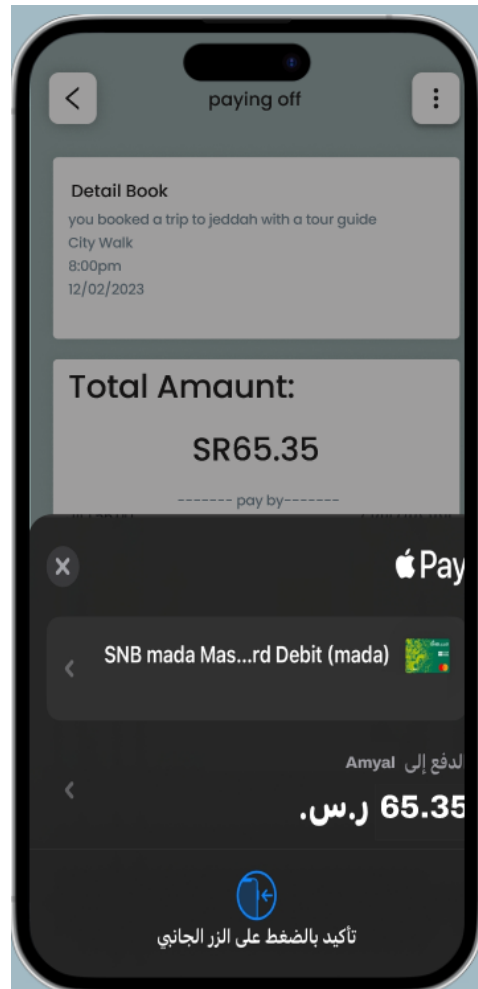

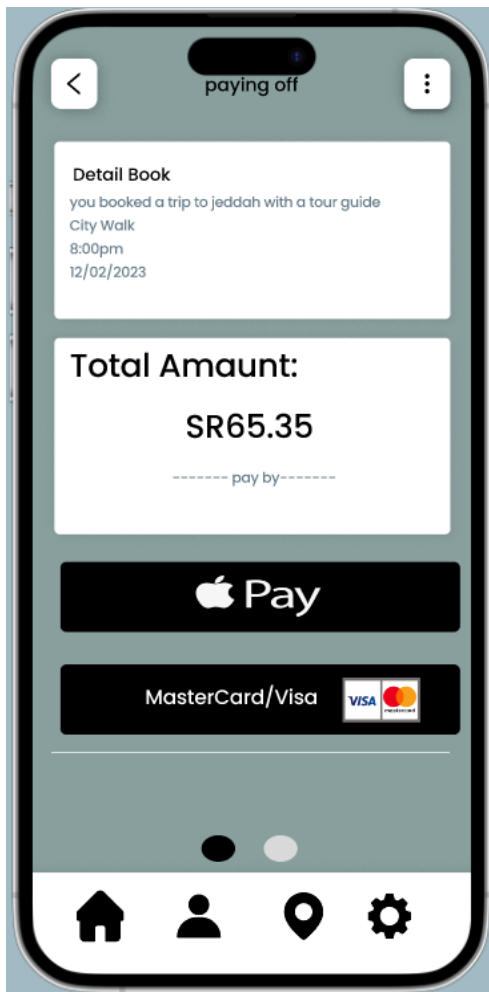

After selecting the tour guide the user can pick any communicating method they like.

If the user picked the chat this is the interface that will appear.

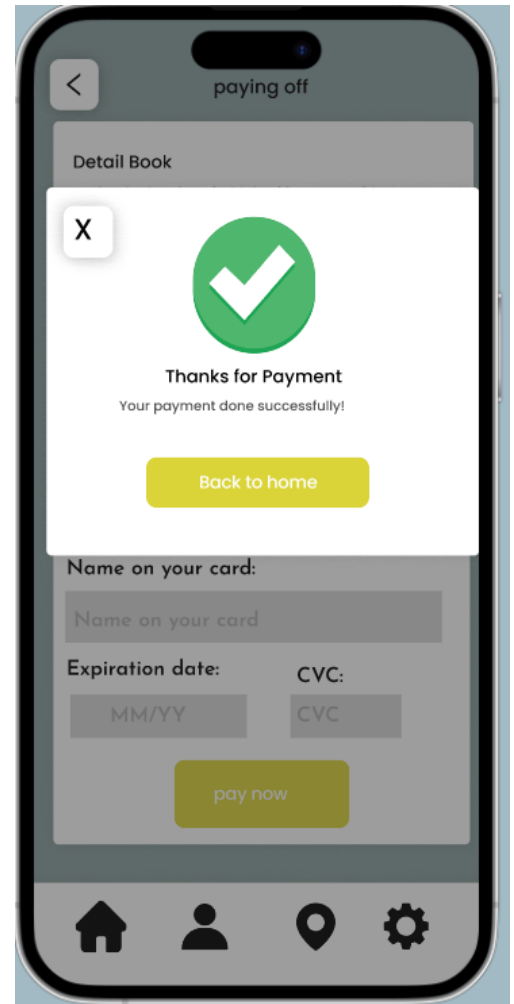

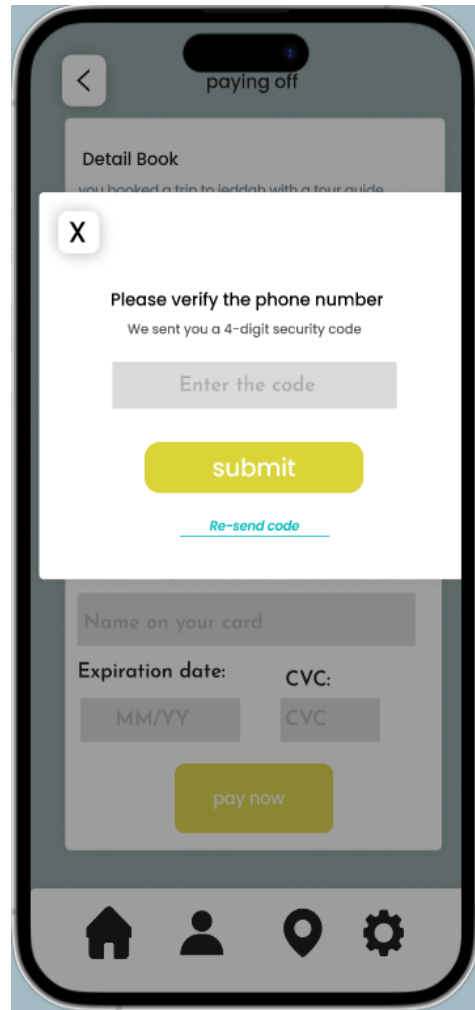

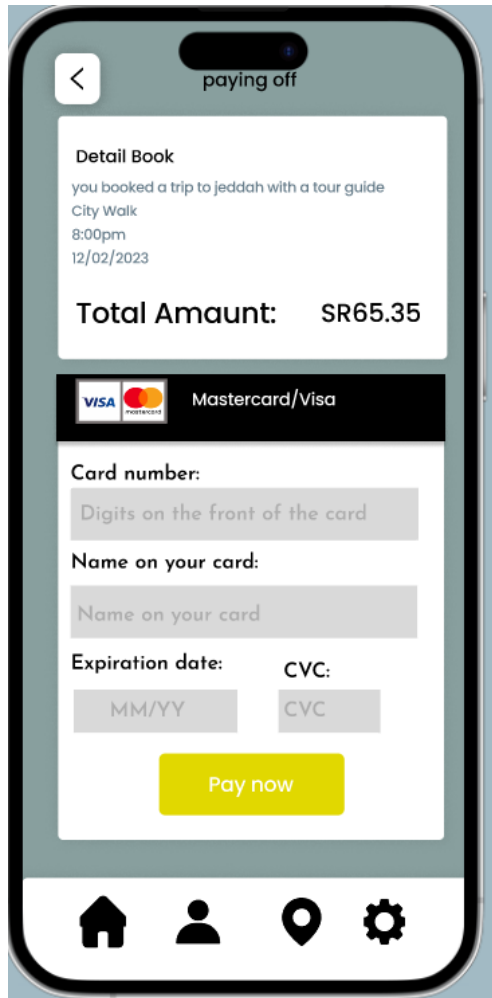

If the user picked the video call this is the interface that will appear.

the last page will be the paying off page where the user can see the details about the reservation with the total price and they can select the payment methods.

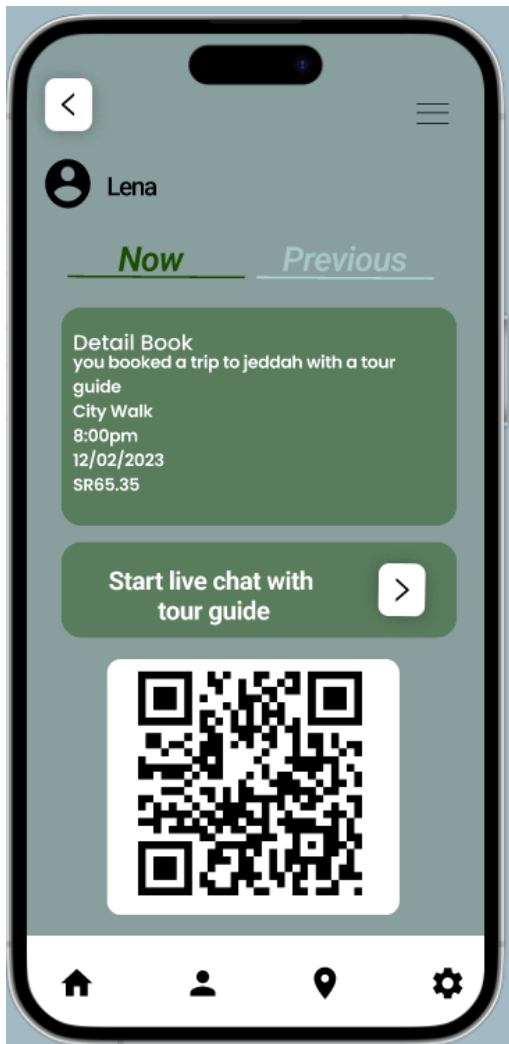

Apple pay method will ask the user confirmation.

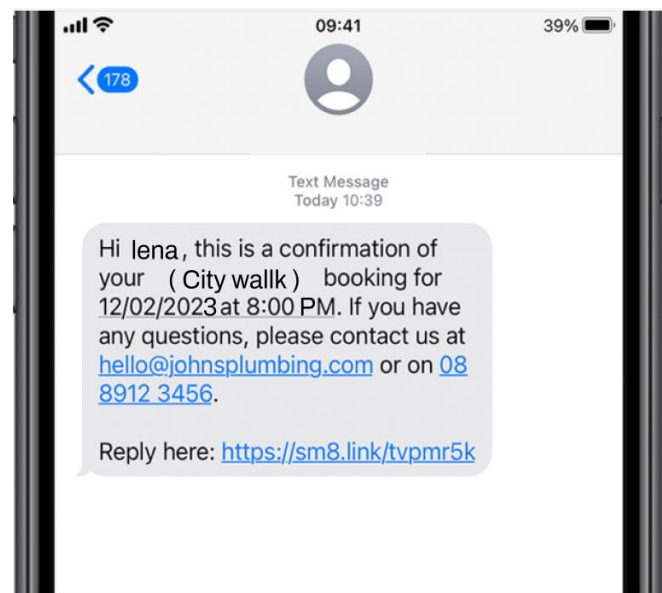

By paying with visa or MasterCard the user should enter the card information.

The user will receive a verification code.

If everything went well, the user will receive this message.

The user will see the barcode so they can visit the place by scanning it.

After paying a confirmation for the user reservation sent to their email or phone number.
